Foreword

Welcome to the mission ahead

Primatix Global is a premier, fully integrated multidisciplinary parent conglomerate and flagship holding company committed to shaping the future of enterprise. We strengthen organisational foundations by delivering strategic governance, ensuring rigorous compliance, and driving digital transformation, empowering businesses around the world to innovate, scale, and thrive.

Through its highly specialised Strategic Business Units (SBUs) - including Primatix Business Solutions, Primatix Intellectual Services, Primatix Digital, and Primatix QRC - the Group delivers a seamless, single-window corporate ecosystem designed to support every aspect of modern business operations. Our integrated service portfolio spans corporate governance and strategic advisory, corporate tax planning, intellectual property protection, patent and trademark services, advanced legal advocacy, next-generation IT solutions, cloud computing, cybersecurity, enterprise risk management, and comprehensive Health, Safety, and Environment (HSE) compliance, alongside regulatory and quality

In an increasingly volatile global marketplace, businesses face complex legal, financial, and technological challenges that demand more than conventional solutions. Primatix Global combines proven corporate governance with advanced AI-driven frameworks to help organisations - from emerging startups to multinational corporations (MNCs) - build resilient operations, uphold the highest ethical standards, and protect their commercial interests.

**Engineering the Future,
Securing the Present.**

CEO's Message

Our Commitment to Borderless Excellence

True operational resilience requires a perfect harmony between human talent and emerging technology. At Primatix, we are actively leaning into this convergence. By integrating intelligent workflow automation, robust analytical frameworks, and interactive digital interfaces, we are not just optimizing current processes—we are helping our clients anticipate market shifts before they happen.

As we look toward the future, our strategic roadmap remains focused on deep security compliance, expanding our technical capabilities, and nurturing world-class professional talent across our global delivery centers.

To those discovering us for the first time, we invite you to experience the difference a truly integrated global operation can make - delivering greater precision, stronger governance, and lasting peace of mind.

Together, let us build an enterprise that simplifies complexity, strengthens resilience, and is ready for whatever tomorrow brings.

M. Ehtesham Khan

Mission & Identity

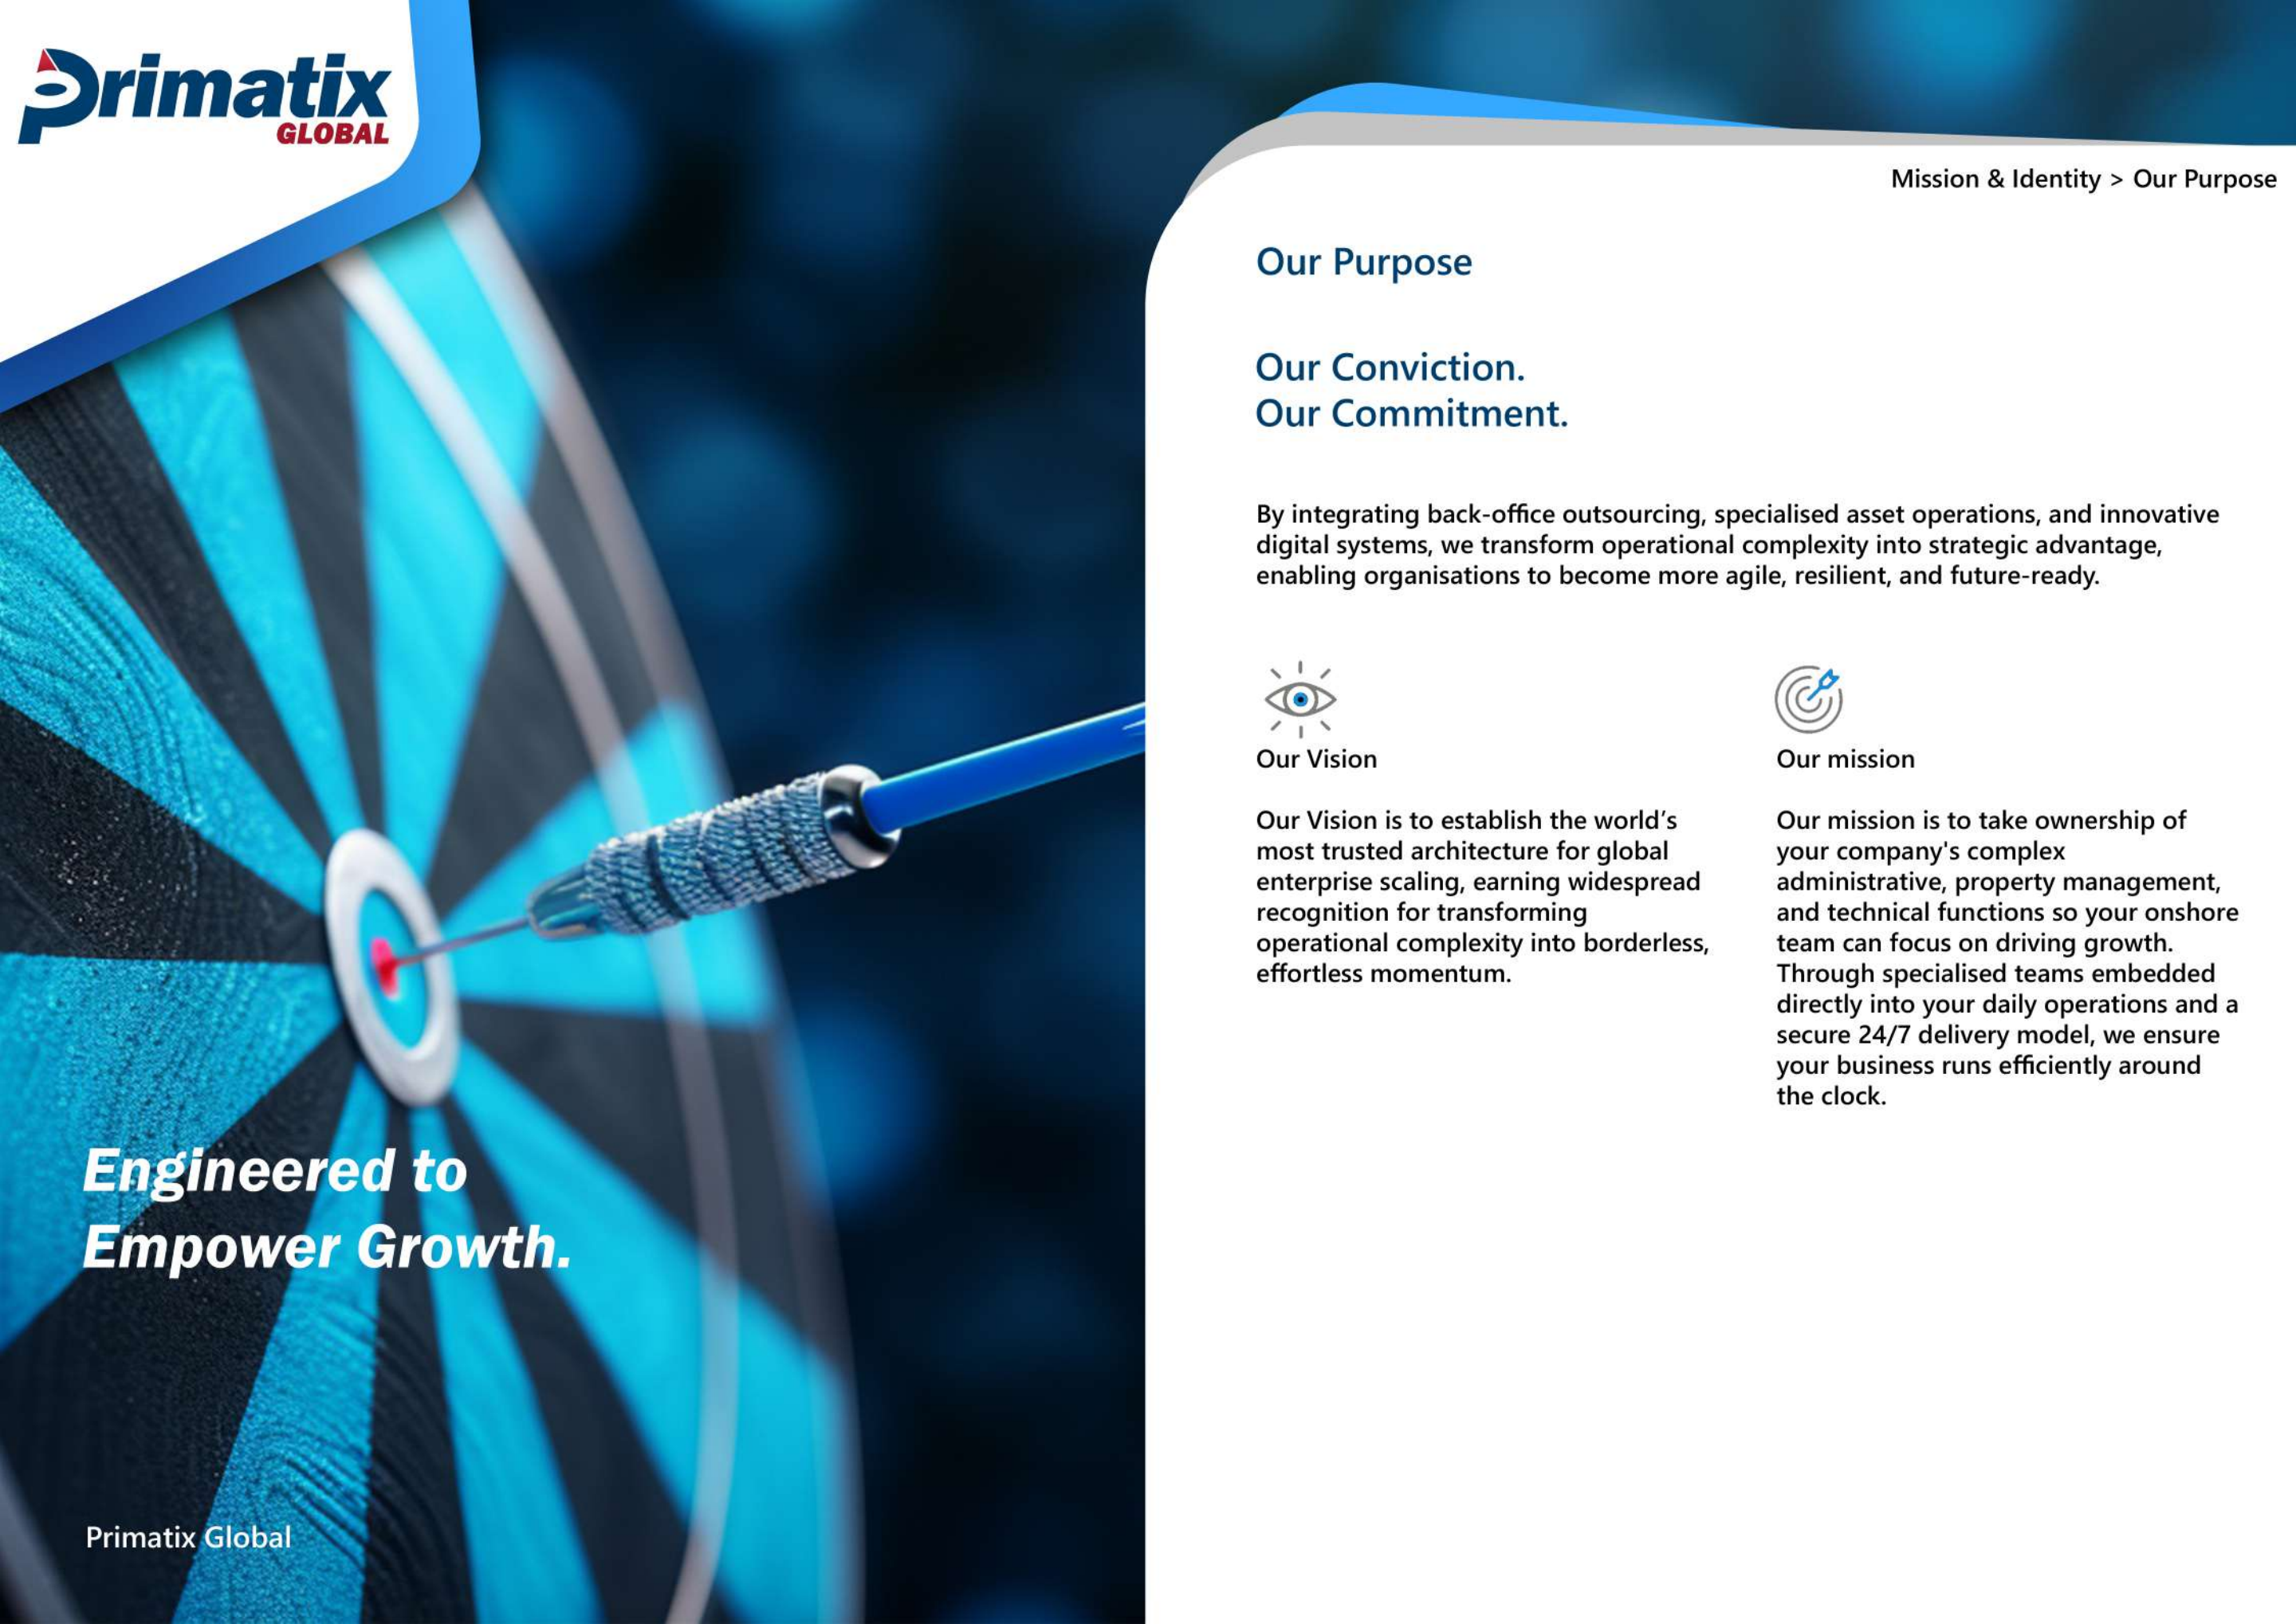

Who we are

The Infrastructure Behind Modern Enterprise

Primatix Global is a premier international operations management and Knowledge Process Outsourcing firm engineered to eliminate corporate friction and drive borderless enterprise growth. Operating across strategic markets in the United States, the United Kingdom, and continental Europe, we serve as a highly integrated, deeply embedded extension of our clients' leadership teams. Instead of functioning as a detached external vendor, our specialized professionals seamlessly synchronize with your internal communication channels, project frameworks, and software ecosystems.

By absorbing complex, time-consuming administrative workflows and technical bottlenecks, we grant forward-thinking enterprises the agility, overhead reduction, and organizational freedom required to focus exclusively on their core strategic vision.

**Scaled for
Global Impact.**

Our Purpose

Our Conviction. Our Commitment.

By integrating back-office outsourcing, specialised asset operations, and innovative digital systems, we transform operational complexity into strategic advantage, enabling organisations to become more agile, resilient, and future-ready.

Our Vision

Our Vision is to establish the world's most trusted architecture for global enterprise scaling, earning widespread recognition for transforming operational complexity into borderless, effortless momentum.

Our mission

Our mission is to take ownership of your company's complex administrative, property management, and technical functions so your onshore team can focus on driving growth. Through specialised teams embedded directly into your daily operations and a secure 24/7 delivery model, we ensure your business runs efficiently around the clock.

***Engineered to
Empower Growth.***

Our Values

Engineered for Precision.
Built for Trust.

P

At Primatix, we enforce absolute accuracy across high-volume data analytics, asset accounting, and cloud-based task management. We treat precision as a strict requirement, ensuring every data pipeline and back-office calculation meets pristine corporate standards.

R

We deploy real-time project dashboards, automated pipeline updates, and clear metric reporting. Our partners always know exactly who is handling their systems, how workflows are progressing overnight, and where their operational benchmarks stand.

I

We implement rigid cybersecurity protocols, role-based access management, and strict compliance measures to protect sensitive financial records and proprietary digital assets. Trust is our foundation; we guarantee your intellectual property remains private, secure, and uncompromised.

S

We design highly flexible KPO and support architectures that pivot immediately alongside your changing software stacks, regulatory updates, or sudden user-growth spikes. We absorb the sudden friction of scaling up so your core team stays lean, focused, and fast.

M

We go beyond passive system maintenance to actively drive technological progress. By engineering custom workflow automation software and developing interactive, AI-driven digital experiences, we bridge the gap between secure back-office stability and modern, front-end digital customer engagement.

***The Architecture of
Trust and Innovation.***

- Business Ecosystem
- People & Culture

**Strategic
Strengths**

Business Ecosystem

**Frictionless Architecture.
Uncompromised Power.**

Radical System Integration

We do not operate as an isolated external vendor. Our specialized teams integrate directly into your existing communication platforms, task managers, and operational software. This native alignment removes structural handoff friction, ensuring real-time collaboration across all departments.

Operational Velocity

Our global delivery framework operates continuously across the United States, the United Kingdom, and continental Europe. While your onshore leadership pauses at the end of the day, our overnight engines absorb administrative, data processing, and customer support workloads, delivering fully updated pipelines by morning.

Complaint and Institutional Security

Built specifically to meet the strict demands of the finance and technology sectors, our environment prioritizes data defense. We implement rigid cybersecurity protocols, role-based access management, and deep regulatory compliance to protect sensitive financial records, property files, and intellectual property.

Interactive Tech Engagement

We bridge the gap between heavy backend support and forward-facing customer engagement. By developing custom workflow software and engineering interactive, AI-driven digital activation experiences, we help brands deploy immersive customer experiences on the global stage.

***Engineered for
Absolute Continuity.***

People and Culture

People.
Precision.
Culture.

Autonomy & Absolute Ownership

We do not cultivate passive task-takers; we breed problem solvers. Our culture empowers individuals to take absolute psychological ownership over their workflows, metrics, and client pipelines. By eliminating micromanagement, we foster an environment where team members proactively identify operational bottlenecks and engineer solutions before they ever impact a client's bottom line.

Architectural Alignment

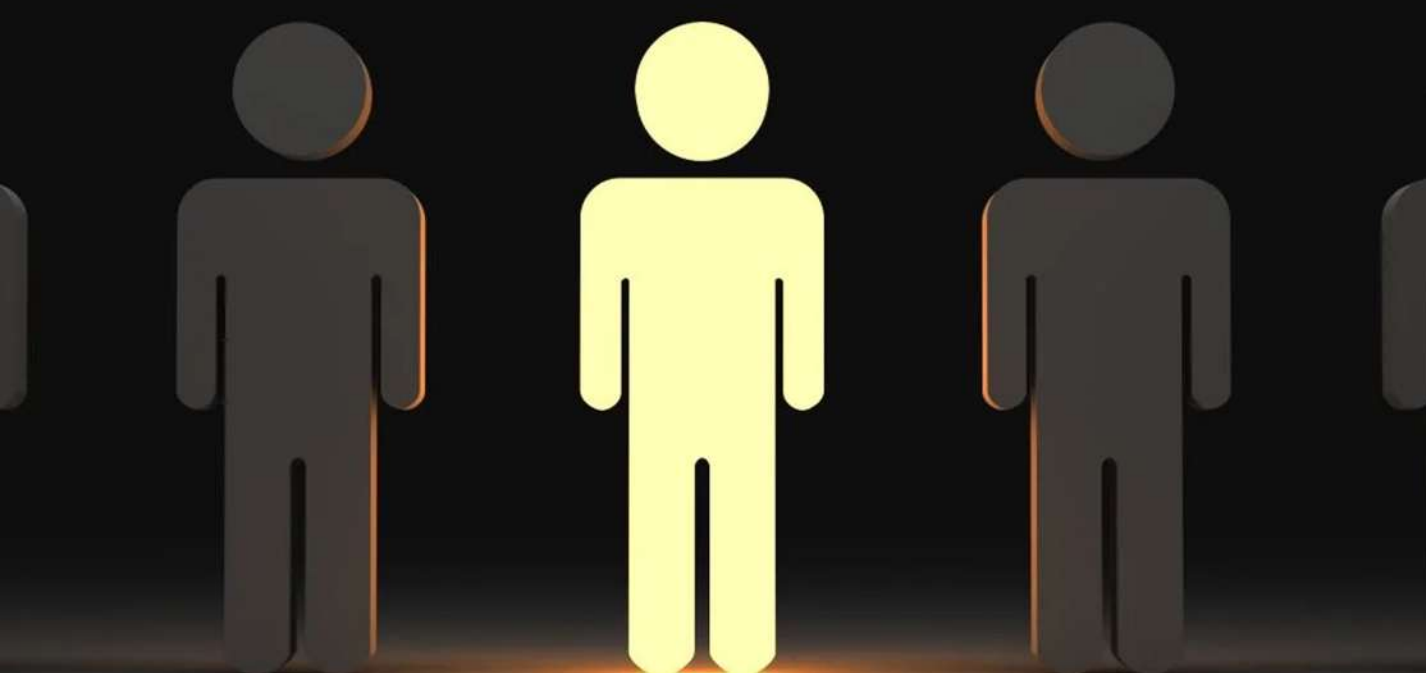

As technology and regulatory landscapes evolve, continuous learning becomes essential. Through the Primatix Academy, our professionals receive ongoing training in data compliance, FinTech infrastructure, intelligent automation, and AI-driven technologies. This commitment to continuous development ensures we remain at the forefront of innovation and consistently deliver exceptional results.

Continuous Cognitive Evolution

The technology and regulatory landscapes shift daily. Through the Primatix Academy, our professionals undergo relentless upskilling in data compliance, FinTech infrastructure, automated workflows, and AI digital technologies. We treat learning not as an occasional corporate requirement, but as an ongoing competitive edge that guarantees elite execution.

Radical Collaborative Synergy

We believe innovation thrives when expertise is interconnected. Our back-office data specialists, real estate asset managers, and software developers collaborate seamlessly, combining operational excellence with creative problem-solving. This cross-functional approach bridges the gap between reliable backend infrastructure and next-generation digital experiences, enabling us to deliver a truly integrated and high-performing workforce, creating a uniquely well-rounded workforce.
